Closed Loop Recycling System

Using 45% Recycled Plastic Collection Bags

The Better Approach to Front-End Recycling

Greenshare Solutions™ provides you with a complete closed loop system:

- Recycling collection bags made with a minimum 45% post-consumer recycled plastic
- Durable, easy to use recycling containers with a lifetime warranty
- Collection, baling and shipping of recycled materials

greensharesolutions.com

GreenShare Solutions™ is a unique alliance created specifically for front-end retail recycling by three of the most respected names in the business – Petoskey Plastics, Rocky Mountain Recycling and Clearstream/Cleartainers.

What is GreenShare Solutions™ Closed Loop Recycling?

- A front-end recycling program that allows you to show customers you care about the environment.
- A cost efficient, turnkey service for managing front-end recycling.
- A sustainable system that diverts post-consumer recycled materials from the waste stream and turns them into products.

Collection bags feature our innovative multi-layer manufacturing process that sandwiches a minimum 45% post-consumer recycled resin between surface layers of virgin resin – resulting in engineered bags that cost less, perform better and are better for the environment.

GreenShare Solutions™ provides you with a complete closed loop system:

- Recycling collection bags made with a minimum 45% post-consumer recycled plastic
- Durable, easy to use recycling containers with a lifetime warranty
- Collection, baling and shipping of recycled materials
